mumkin

faqatgina bitta
expression bo'lsa script da

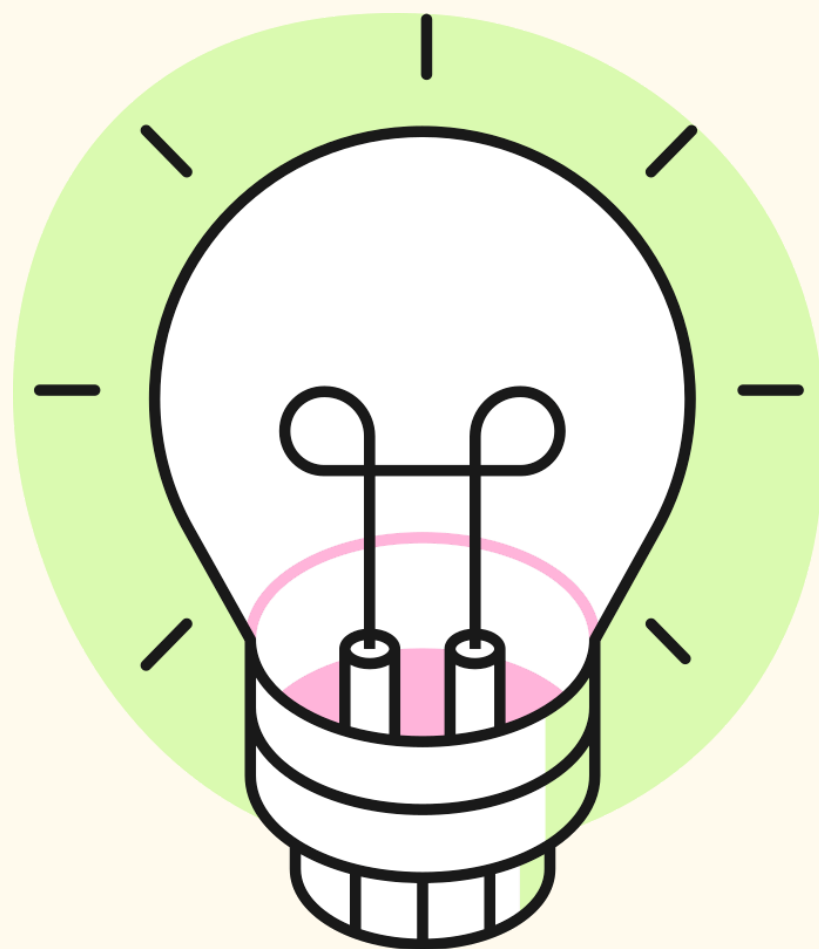

(a, b) => a + b

Curly braces'lar unutishi
mumkin va javob return
qilinadi

birdan ortiq expression'lar
bo'lsa

```
(a, b) => {  
  a *= 2; return a + b;  
}
```

Curly braces va return
statement talab qilinadi

XULOSA

1. Arrow Functions
2. Standard argumentlar
3. Rest Operator
4. Funksiya ichida funksiya yaratish
5. Callback funksiyalarni tushunish
6. bind()
