JAVA SCRIPT

Nevermind

Teacher: Jamshid

MORE CORE DATA TYPES

Numbers

2, -3, 22.956

raqamlar bilan ishlashda va hisoblashda kerak bo'ladi

Strings (Text)

'Hi', "Hi", `Hi`

qabul qilgan ma'lumotni to'plab qayta chiqarishda ishlatiladi

Booleans

true / false

faqatgina ikkita tanlovli kodlarda ishlat

Objects

{ name: 'Max',
age: 31 }

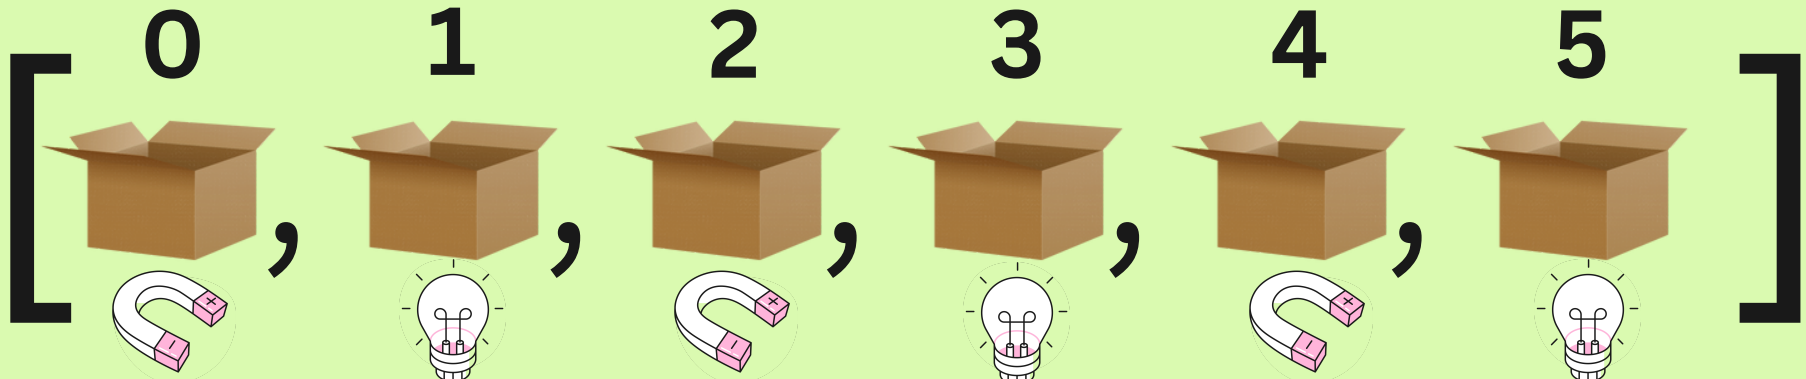

guruhlangan ma'lumotlar uchun muhim, sizga ma'lumotlarni tartiblashda yordam beradi

Arrays

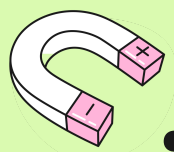

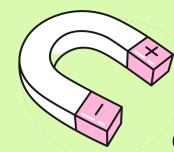

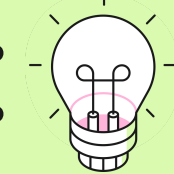

[1, 3, 5]

ro'yhatli va aniqlanmagan miqdordagi ma'lumotlar uchun muhim,

ARRAY AND OBJECT EXPLANATION

let array1 =  length = **6** elements

{ **key**: value, **key**: value, **key**: value, **key**: value }

let object1 = { name: , age: , year: , job:  }

key value pair

length = **4** elements

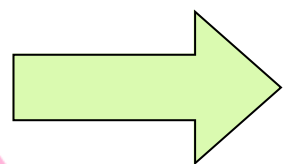

OBJECTS COMMON SYNTAX

Correct 

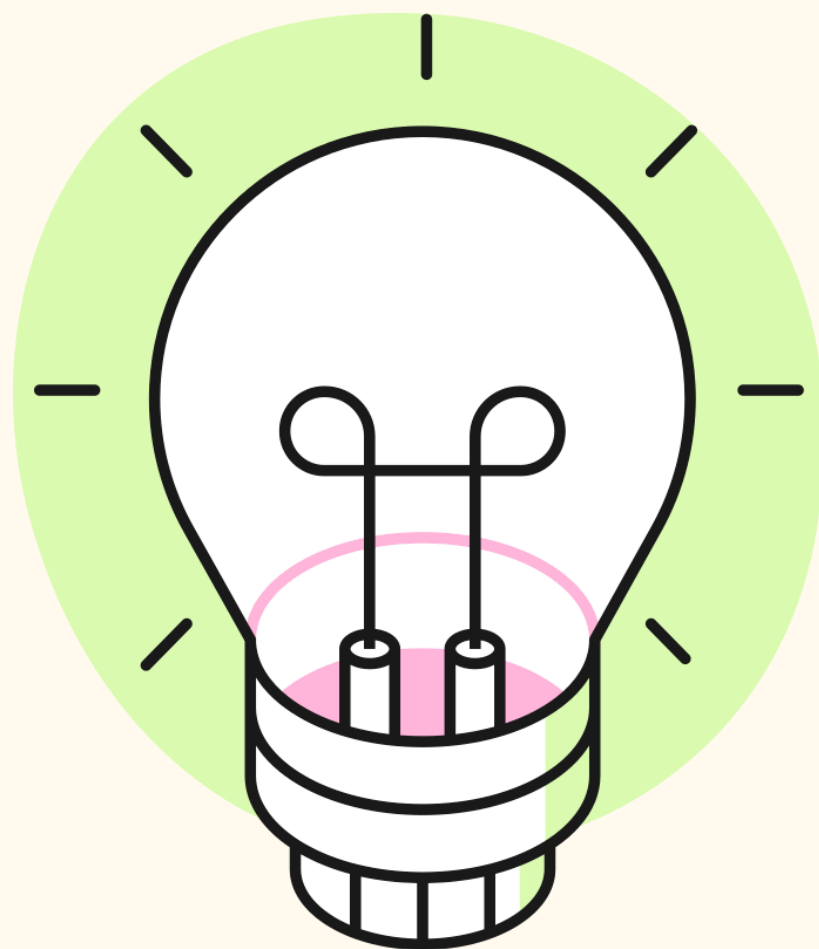

```
1 let obj1 = {  
2   name: "Jamshid",  
3   age: 18,  
4   year: 2004  
5 };
```

Incorrect 

```
1  
2 let obj2 = {  
3   name = "Kimdir";  
4   age = 20;  
5   year = 2002;  
6 }  
7
```

kodimiz to'g'ri ishlashi uchun bu qoidalarni bilish talab qilinadi

XULOSA

1. Array va Obyekt haqida
2. Array va Obyektga ta'rif
3. Arraylarni ishlatish
4. Obyektlar yaratish
5. Obyektning umumiy sintaksisi
6. Obyektning ma'lumotiga bog'lanish
