Teacher: Jamshid

STYLING DOM ELEMENTS

'style' property orqali

Elementning to'g'ridan-to'g'ri css stiliga ta'sir o'tkazadi

Elementning stilini 'ichki stil' orqali boshqaradi

Stil berishdagi nomlar stilning nomiga bog'liq holda o'zgaradi (backgroundColor)

className orqali

Elementga berilgan class orqali to'g'ridan-to'g'ri stillarini o'zgartiradi

Barcha classlarni bittada boshqara oladi

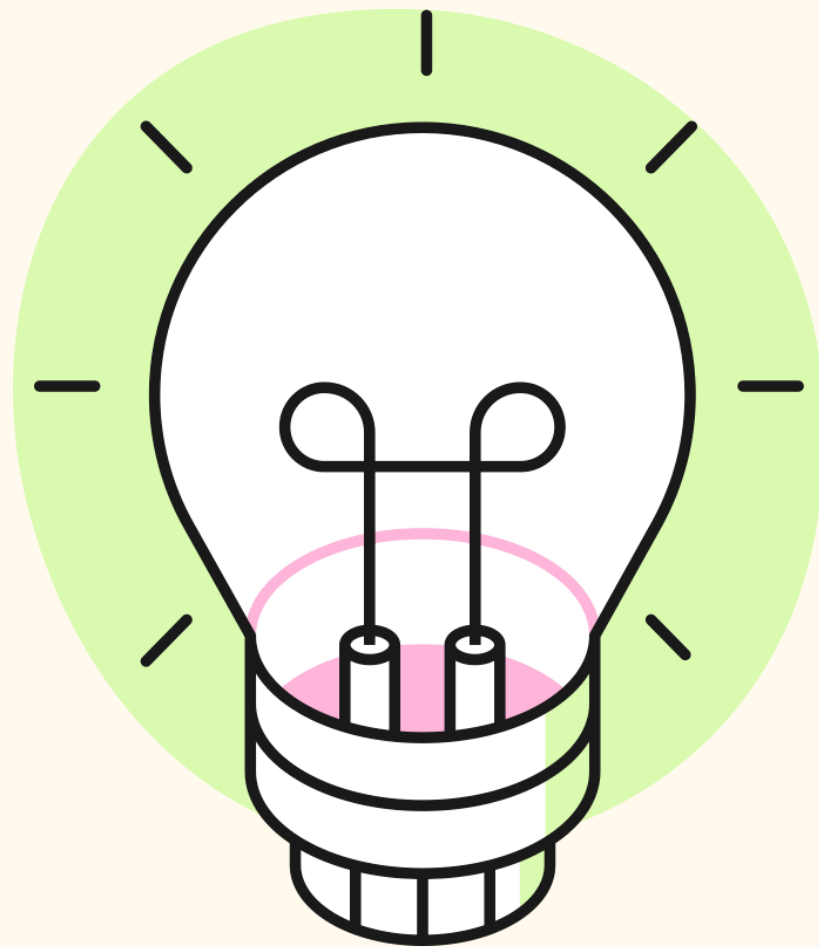

Id yoki boshqa xususiyatlar bilan ham stillarni boshqara olishingiz mumkin

classList orqali

Qulaylik bilan classlarni qo'shish, o'chirish va o'zgartirish mumkin

Qo'shilgan classlarni ustidan to'la boshqara olish

Ehtiyotlik bilan className bilan ham ishlatsa bo'ladi

XULOSA

1. closest()
2. Bir xil darajadagi elementlarni belgilash
3. DOM Traversal vs Query Methods
4. DOM elemenlarga stil berish
